Cotton Textiles Export Promotion Council (TEXPROCIL) is one of India's leading export promotion council in textile sector. Products covered by TEXPROCIL are cotton, cotton and blended yarns, cotton and blended fabrics for all types of end use including home textiles and made-ups.

The Council has launched "TEXPROCIL- Marketplace" - a B2B portal to connect the Indian exporters with textile importers across the world on a 24x7 basis round the year. Information about product range and company profiles of leading Indian cotton product exporters is available in this platform "texprocil.co.in". Importers can login at the portal to look for the right suppliers for all their sourcing requirements of cotton textile products and communicate directly with the exporters.

This is a user friendly module for the importers to reach out to Indian suppliers with minimum efforts. In case if buyers are unable to find a right supplier for their products at this B2B portal, they can also post their requirement on the business platform and at the back-end the Council will do necessary follow-up and help the importers to identify suppliers for their sourcing requirements.
