Digital Catalogue

CII has launched a **Digital Catalogue Service,** as a much-needed support for Industry in the current times for identifying the right solution providers/ partners in their quest for digital transformation and innovation.

It is a single Stop Platform developed by CII Digital Team to help Industry take an informed decision to reach the right solution provider through this platform which shares not just the details about the company /solution provider but also the feedback from its engagement with its earlier clients related to a certain requirement.

A segregation of vendors will enable industry to identify the right solution provider for the specific work/ requirement and help companies to do the perfect match making based on the helpful information available in the catalogue on the basis of various vendor categories.

We intend to make the Catalogue more robust for industry by including several features in terms of including the categories for the vendors, feedback from clients of the companies who have used the service. In the second phase the Catalogue would also feature product comparison and demonstrations.

You are requested to follow the below given steps to view the details of your company and also update the company data (mainly city and state fields and map pointer) and images, logo etc. and help us to connect you to the right consumers.

If you are **Already Registered*** then you are requested to follow the below given steps to view the details of your company and also update the company data (mainly city and state fields and map pointer) and images, logo etc. and help us to connect you to the customers/ industry. (*Earlier we had planned this initiative as a Directory and had reached out to some of the IT Solution Providers – as a step ahead its now a Digital Catalogue which would accelerate the digital transformation journey for companies)

Steps to update your profile:

- 1. Click on the following URI : http://directory.ciicdt.com/
