**Uzbekistan, Tashkent - AN Podrobno.uz.** An enterprise for the production of elite seeds will open in the Samarkand region. The production, created jointly with the Indian company Nath Bio-Genes, will be located on 20 hectares, the correspondent of Podrobno.uz reports.

Cooperation will be established in accordance with the agreements reached between the Republic of Uzbekistan and the state of Gujarat.

Nath Bio-Genes executives Nandkishar Kagliwal and Venkatesh Kulkarni visited Uzbekistan and met with the Minister of Innovation Development Ibrohim Abdurahmonov. Organizational issues were discussed and meetings were held with representatives of departments specializing in seed production, plant quarantine and agriculture.

The company will specialize in the production, sorting, packaging, packaging and export of elite seeds of cotton, corn and vegetables using advanced technologies in India. It will operate on the basis of the Mirzayev Shuxrat Kenjayevich farm in the Pakhtachinsky district of the Samarkand region with direct investments during 2020.

In addition, the Indian side invited the Ministry of Innovation Development to open a representative office in Mumbai, the largest financial, foreign economic and industrial center of India, in order to attract investors to the republic.

As the ministry recalled, Nath Bio-Genes participated in the regional exhibition of advanced technologies and innovative developments in agriculture, which was held in Andijan region on February 24-25, 2020.
