

international healthcare tourism congress

18th - 19th march 2016
the lalit ashok, bengaluru

Summary

Welcome Note

It is with immense pleasure that we welcome each one of you to the “**International Healthcare Tourism Congress 2016**”, Bengaluru.

It is our humble effort to organize this unorganized sector of Medical Tourism Agents. We have all come together and have joined hands for a good cause with a pledge of taking Healthcare Tourism to a greater height.

Medical tourism is a growing sector in India, with estimated annual growth rate of 30%. As medical treatment costs in the developed world balloon - with the United States leading the way; more and more Westerners are finding the prospect of international travel for medical care to India. The number is estimated as 150,000 overseas tourists who visit India for cost effective healthcare every year.

Advantages of medical treatment in India include reduced costs, the availability of latest medical technologies, and a growing compliance on international quality standards, as well as the fact that foreigners are less likely to face a language barrier in India. The Indian government is taking steps to address infrastructure issues that hinder the country's growth in medical tourism. Treatment costs in India are estimated to start at around a tenth of the price of comparable treatment in the USA or UK. The most popular treatments sought in India by medical tourists are alternative medicine, bone-marrow transplant, cardiac bypass, eye surgery and hip replacement.

This congress of eminent speakers will address the challenges in healthcare tourism. It is our fervent hope that each of you will utilize the immense opportunities, as this congress provides to revolutionize your business and in turn the economy. We are sure you will enjoy the hospitality & the climate of Bengaluru.

Look forward to seeing you all,

With best wishes,
